Electra Plus®

Conductive Vinyl Flooring

2018

Special Features

Applications

- Intensive care units
- Server rooms
- Computer rooms
- Electronic manufacturing units
- Shop floors
- Radiotherapy and lab areas
- Clean industries
- Electronic equipment rooms

Product Description

Electra Plus® is a static-conductive, flexible homogeneous vinyl floorcovering with an electrical resistance of ($104 \leq Rt \leq 106$) (EN 1081).

Electra Plus® is homogeneous through the 2 mm thickness of its carbon designed wear layer and has a carbon conductive backing to ensure optimal and constant static -conductive properties and giving it a total thickness of 2.10 mm

Electra Plus® is anti-fungal and anti-bacterial and is available in sheets 2 m wide or tiles. It complies with the European norm EN 649 (34-43) and has excellent resistance to static and rolling loads.

Electra Plus® is VOC (≤ 12 Chronic REL) and formaldehyde compliant ($\leq 9.0 \mu\text{g}/\text{m}^3$) according to the CDPH/ EHLB/Standard, Method V1.1-2010 (certificate 120316-01).
